

NURSING SERVICES

Nursing services, including nursing home care, may be provided subject to the following guidelines:

The Department may authorize the service of a private duty nurse or aide for eligible consumers. A written recommendation from the attending physician will be placed in the case file prior to authorizing the service. Payment shall be made at the prevailing rate established and/or approved by the Department. This service should be restricted to short-term care (two weeks or less). For two weeks or more, see convalescent care.
